

Do you want to take charge of your health from the comfort of your own home?

Wouldn't it be nice to address your health care needs and concerns with one person coordinating your care?

We have the free program for you!

We assist Vets with physical and mental health conditions to manage their care. Home Telehealth is an optional program where easy-to-use equipment is provided for use in your home. You are paired with a nurse who cares about your health, goals, and quality of life. The nurse is the link between you and the VA for any of your health care needs both within the VA and beyond. For further information please call 641-828-5088.
